

amiad filtration systems®

Customer: Boeing

Location: Seattle, Washington, USA

Filter Type and Quantity: 6" SAF 4500 316L stainless steel, high temperature, w/10μ

Water Source: Steam condensate

Flow Rate: 80-200gpm at 80psi and 180°F

Installation Details: This system provides steam to various parts of the plant. Condensate water will absorb contaminants from the carbon steel piping while changing from low to high temp. Since the filter is installed the use of chemicals has dropped by 2/3 and maintenance down time is minimal.

Installation Date: 12/2002
