

amiad filtration systems®

Customer: Hines Inc.

Location: Arizona, USA

Filter Type and Quantity: 2x8" SAF 6000w/100µ

Water Source: Open basin cooling tower

Flow Rate: 1600-2000gpm at 35psi (per unit)

Installation Details: The Hines building management group owns and operates a large office building in Phoenix.

Three years ago they were provided with sand separators to protect their cooling tower on the newly built building. The sand separators never performed to their satisfaction and were replaced with the AMIAD screen filters that are guarantee to remove all partials greater than 100 micron.

Installation Date: 6/2003
